Note : Need to include Port/ICS for other country from UNLOCODE List.

Column Function

This column contains a 1-digit function classifier code for the location, where:

- 1 = port, as defined in
- 2 = rail terminal
- 3 = road terminal
- 4 = airport
- 5 = postal exchange office
- [6 = reserved for multimodal functions, ICD's, etc.]
- [7 = reserved for fixed transport functions (e.g. oil platform)]
- B = border crossing
- 0 = function not known, to be specified

A group of digits "1234----" in this column means therefore that all four specified functions apply to the location. The presence of the digit "4" will normally mean that the code element shown is an approved IATA code. The digit "0" means that the criteria for inclusion apply, but that no information is available regarding the specific transport mode functions of the location.

**NOTE:** Please download the latest UNLOCODE from UNECE site
